**Silca Grate Earns ICC-ES Evaluation Report
or
ICC-ES ESR# 3748 Verifies that Silca Grate Meets Code Requirements
or
Silca Grate is Now ICC-ES Evaluated (See ESR# 3748)**

Silca Grate, manufactured by Silca System recently received an evaluation report ESR# 3748 from ICC Evaluation Service (ICC-ES), providing evidence that the Silca Grate meets code requirements. Building officials, architects, contractors, specifiers, designers and others utilize ICC-ES Evaluation Reports to provide a basis for using or approving Silca Grate in construction projects under the International Building Code.

ICC-ES President Shahin Moinian explains why ICC-ES Evaluation Reports are so important. “Silca System can now reference the evaluation report to ensure building officials and the building industry that the product meets I-Code requirements,” Moinian said. “Building departments have a long history of using evaluation reports, and ICC-ES operates as a technical resource with the highest quality of product review for the building department. Final approval of building products is always in the hands of the local regulatory agency.”

ICC-ES thoroughly examined Silca System’s product information, test reports, calculations, quality control methods and other factors to ensure the product is code-compliant.

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs), [Building Product Listings](#) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. Reports from both listing programs are now accepted in Canada. ICC-ES is a subsidiary of the [International Code Council](#)® (ICC®). For more information, please visit www.icc-es.org.

Silca System is a paradigm shift in the decking industry that has been embraced with open arms. The Silca Grate benefits Architects, Builders, and Home Owners by providing the ability to install natural stone, and manufactured pavers on any elevated surface, like decks, porches, balconies, and many other applications.

Silca System offers new ways for installing deck surfaces with low maintenance products that will last year after year.
